DETAILED ACTION

Election/Restrictions

1. The previously restriction requirement mailed 04/21/03 was improper, a new restriction requirement follows.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a method of producing an optical compensatory sheet, classified in class 349, subclass 187.
 - II. Claims 4-9, drawn to a liquid crystal layer producing apparatus, classified in class 118, subclass 600.
 - III. Claim 10 drawn to a thermal treating method, classified in class 432, subclass 8.
 - IV. Claim 25 drawn to a dust removing method, classified in class 134, subclass 37.
 - V. Claims 11-24 and 40, drawn to a thermal treating apparatus, classified in class 432, subclass 145.

Art Unit: 2812

VI. Claims 26-39 and 41, drawn to a dust removing apparatus, classified in class 134, subclass 43+.

3. Inventions I, III, IV and II, V and VI are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practice by hand.

4. Inventions II, V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, different modes of operation and different effects since the inventions disclosed patentable distinct apparatus.

5. Inventions I, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, different modes of operation and different effects since the inventions disclosed patentable distinct methods.

Art Unit: 2812

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-VI, restriction for examination purposes as indicated is proper.
8. A telephone call was made to Darryl Mexic on 07/15/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
